# 3D modeling

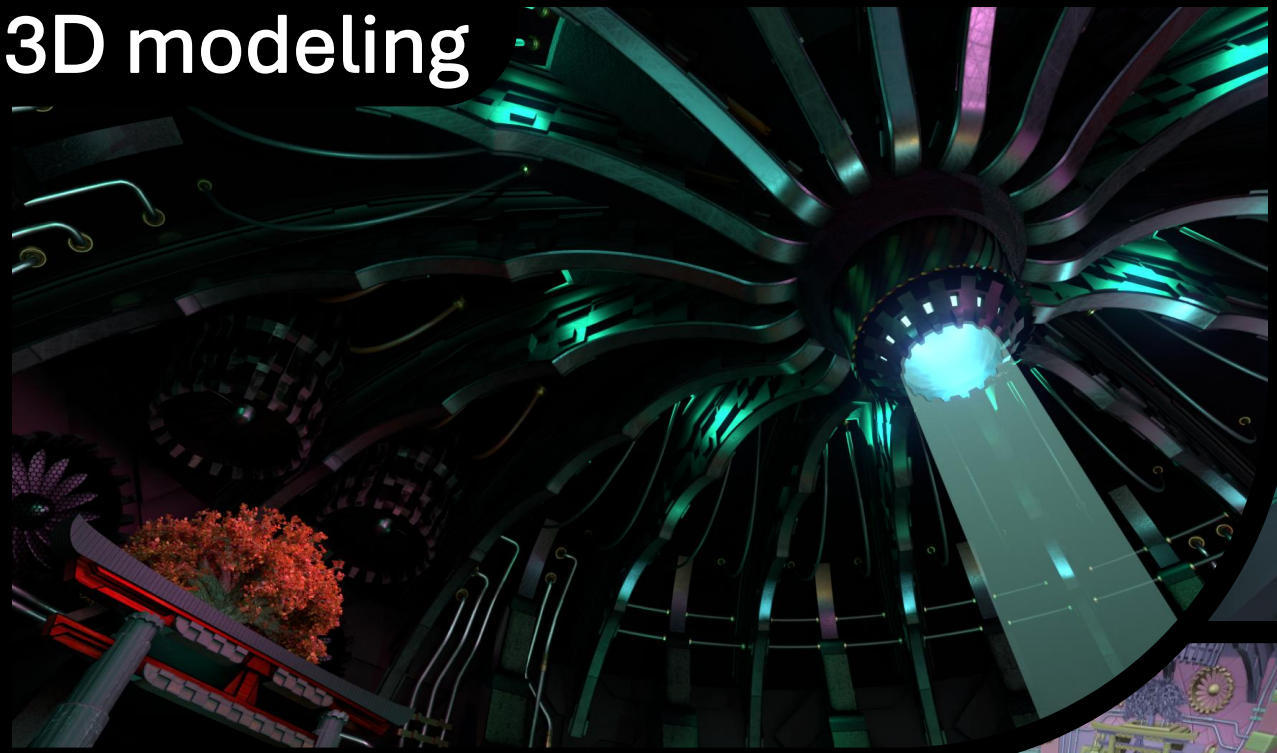

Sci-fi fight arena

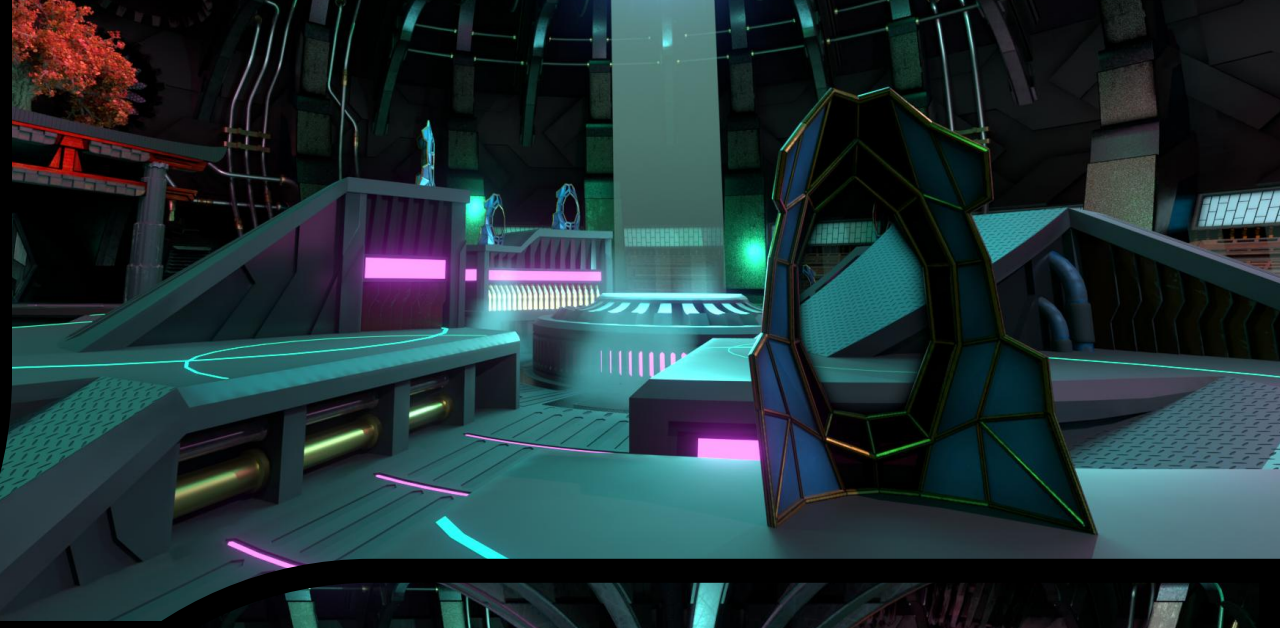

game ready environment model (mid-poly)

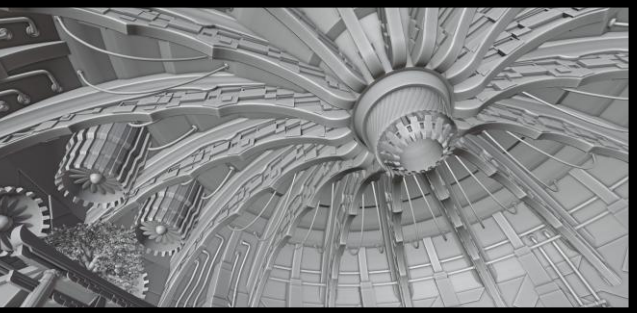

Modeled in Blender

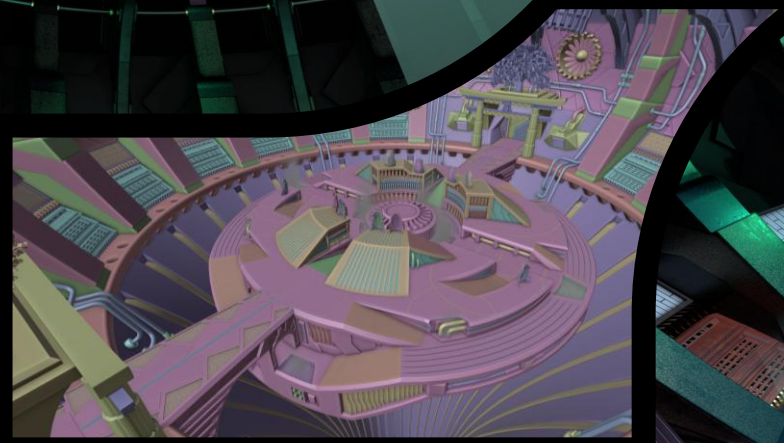

Textured in Blender & Substance Painter

# 3D modeling

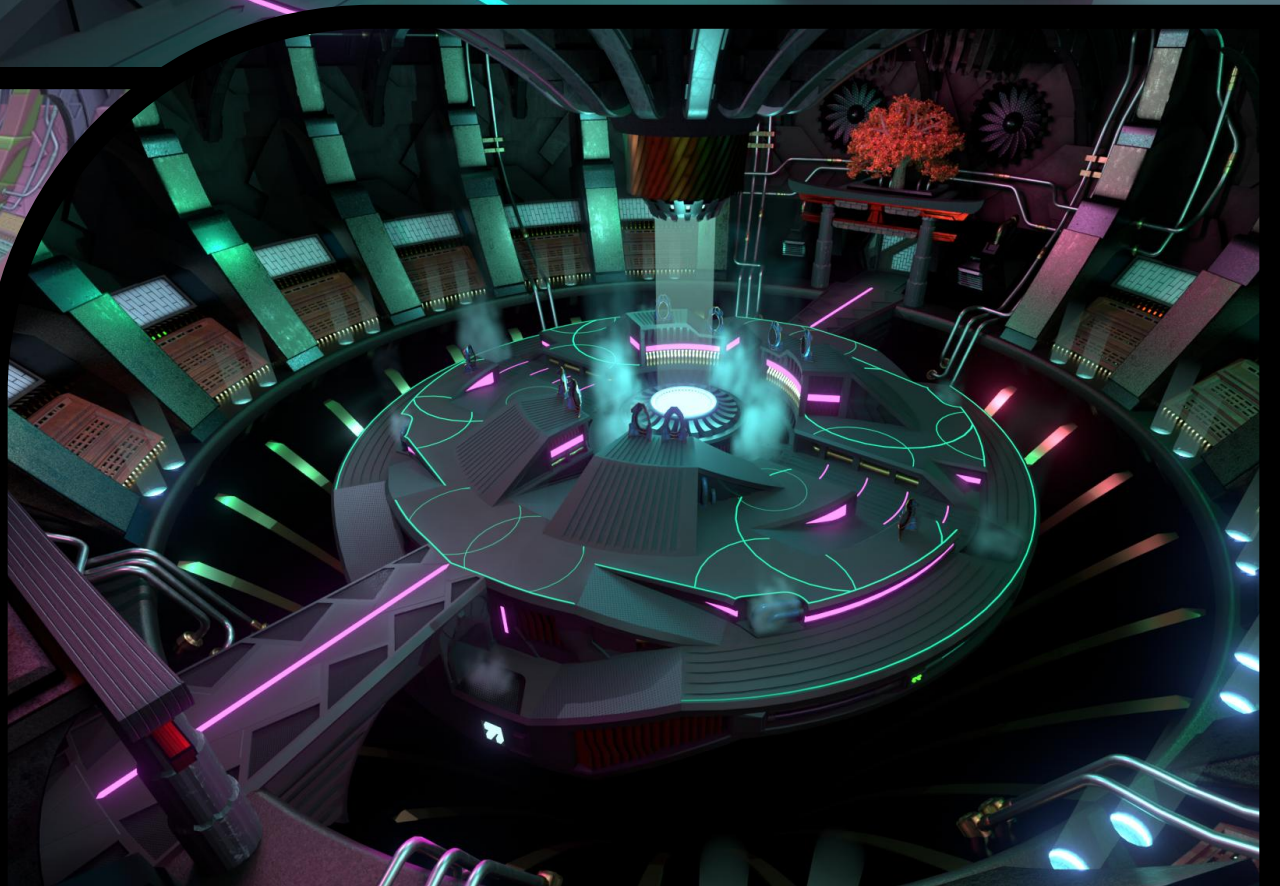

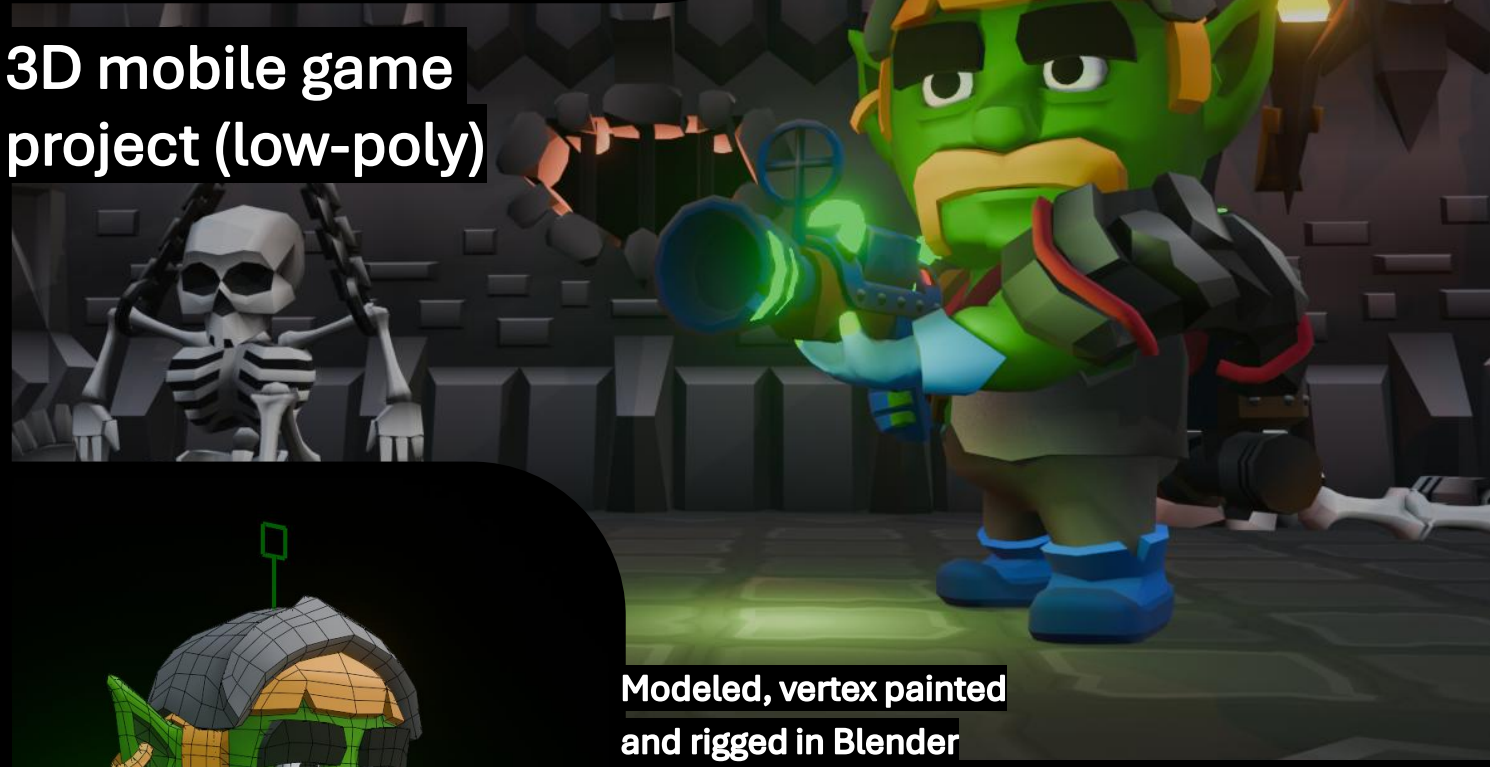

# 3D modeling

# Dungeon Crawler

3D mobile game project (low-poly)

Player character

Modeled, vertex painted and rigged in Blender

3D modeling

# Dungeon Crawler environment assets and props (low-poly)

Modeled and vertex painted
in Blender

# 3D modeling

A design study assignment
for a German exercise equipment
manufacturer, Proxowell.

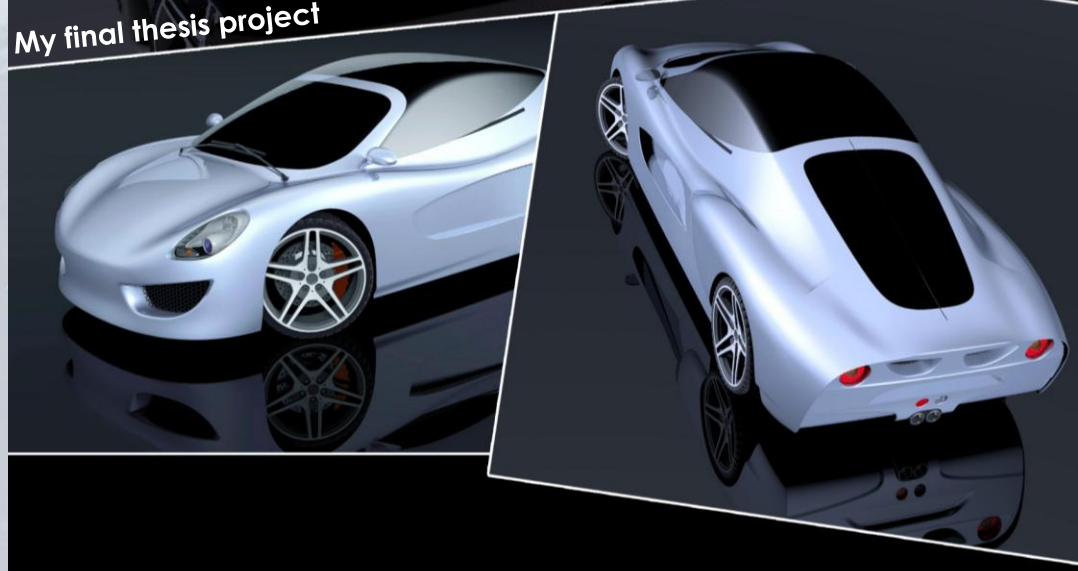

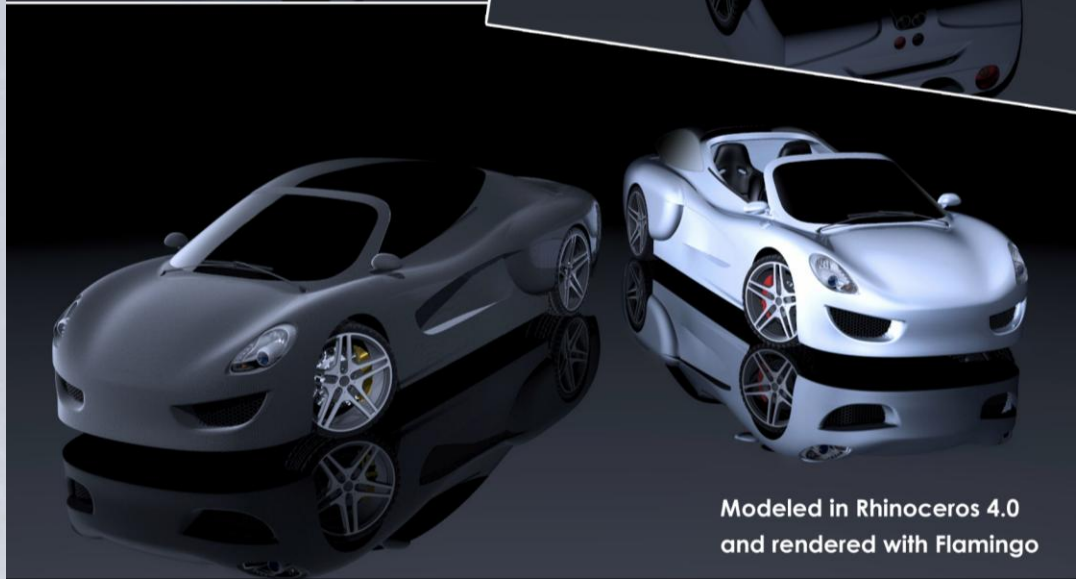

Modeled in Rhinoceros 4.0,
rendered with Flamingo and Solidworks

My final thesis project

Modeled in Rhinoceros 4.0
and rendered with Flamingo

# 3D-modeling

Here are some of the bathrooms I designed at Laattapiste Oy and Netrauta Oy.

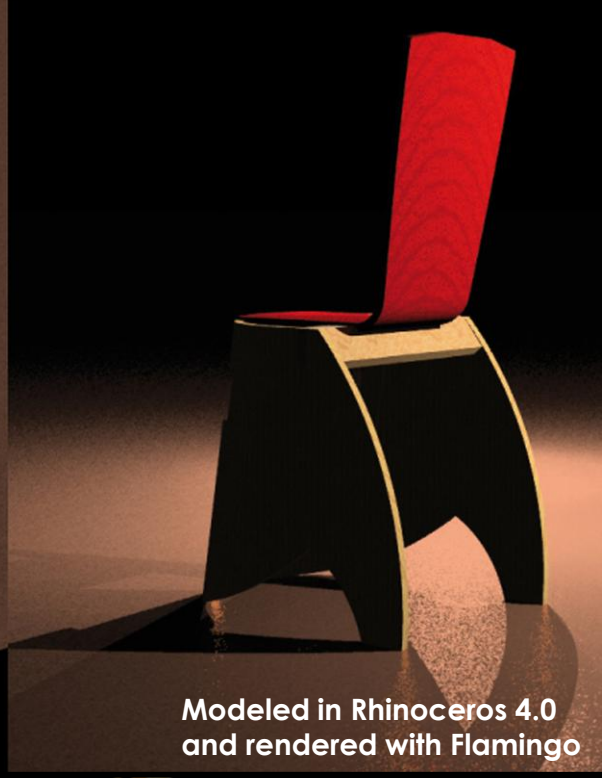

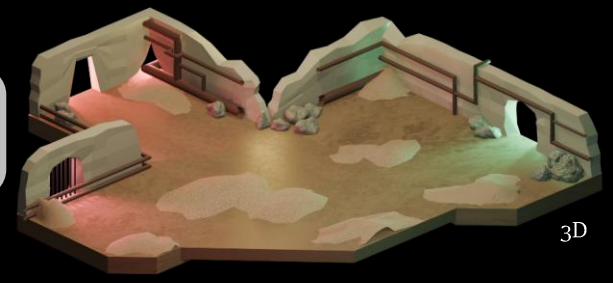

Modeled in Rhinoceros 4.0 and rendered with Flamingo

# Level design for Dungeon Crawler

1. 3D modeled and hand drawn blockouts

3D

By hand

3D

2. Hand drawn paintovers + decorative props

3. Refining, adding and experimenting

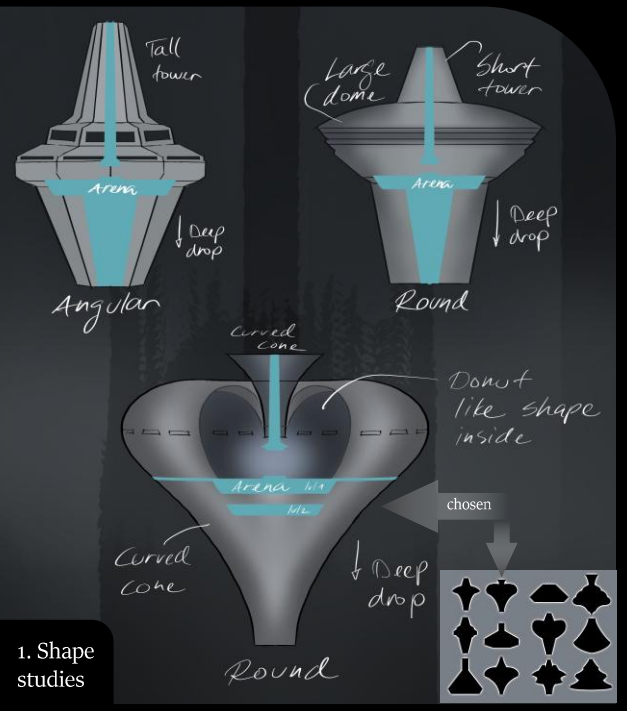

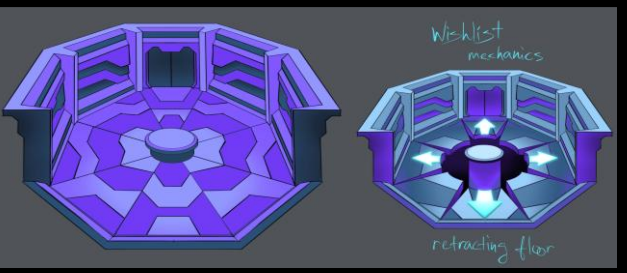

# Level design

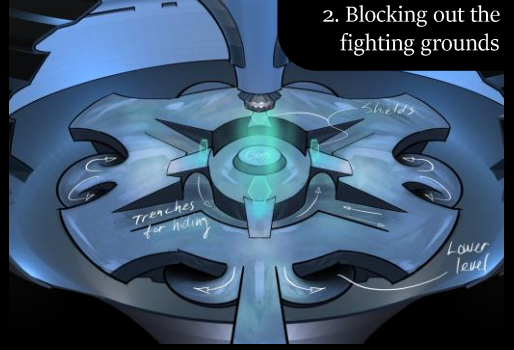

**Sci-fi fight arena**

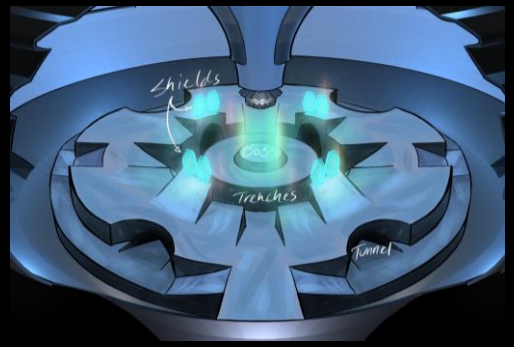

1. Shape studies

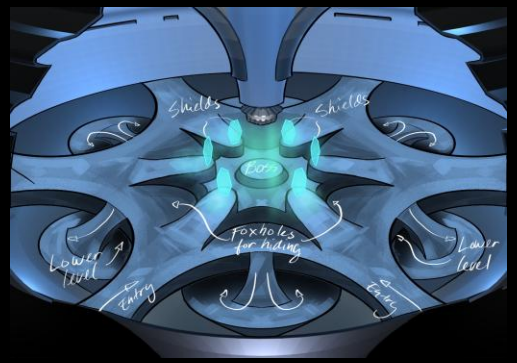

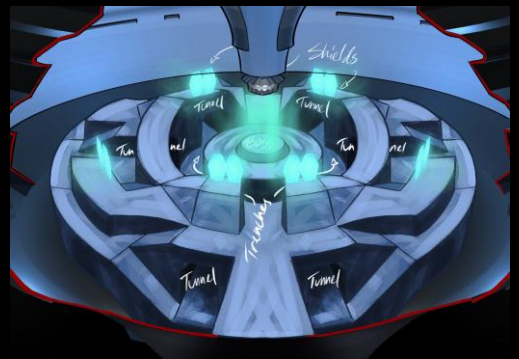

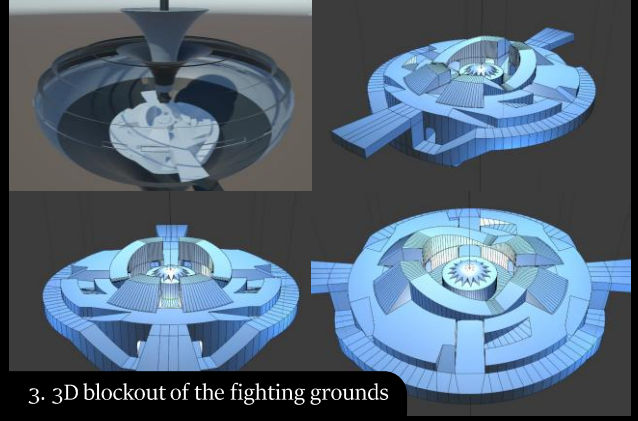

2. Blocking out the fighting grounds

3. 3D blockout of the fighting grounds

4. Roof & wall beam designs

5. Paintover on top of the final 3D blockout

6. Lower arena design studies

7. Final concept ready for 3D modeling

# Level design and lighting for a horror office game demo

## Unreal Engine 5.6

Levels were designed with Unreal free and bought assets. Lighting design included local lighting, global lighting settings, post-processing and optimisation work.
No light baking, only dynamic lights.

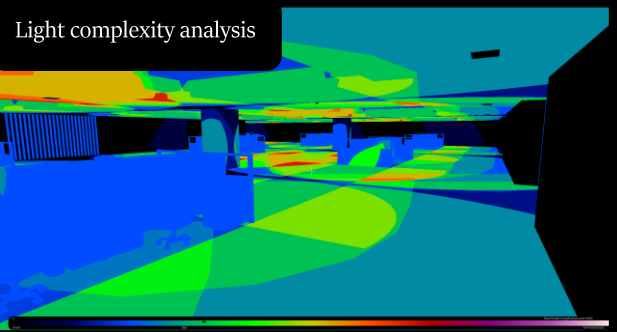

Same scene, different moods

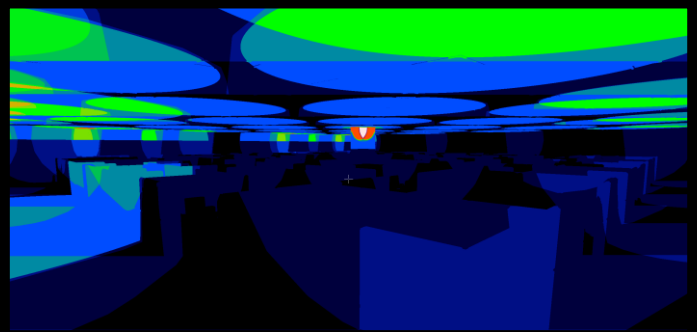

Light complexity analysis

# Character design

## Dungeon Crawler

**Player character concept art**

1. Shape studies

2. Exploring character designs and different ideas

3. Analysing color values and silhouettes

4. Refining the character design and details.

5. Finalising the design

6. Ready for 3D-modeling

# Character design
